# A-37 cockpit

instructions

1. Glue the various parts into the cockpit tub

Part designations use lowercase letters so they are not mixed up with parts of the aircraft model.
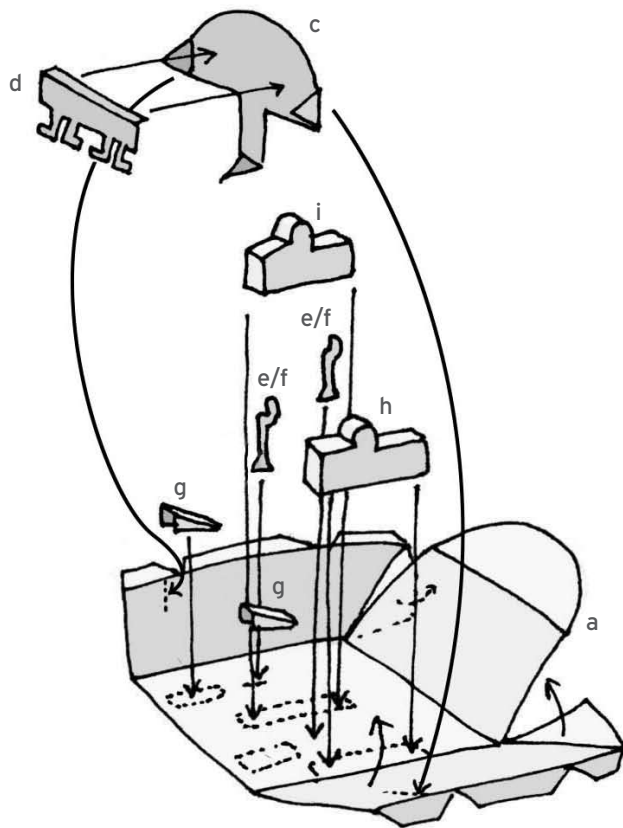

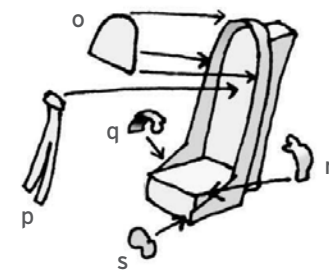

Parts from the A-37 model are given in brackets.
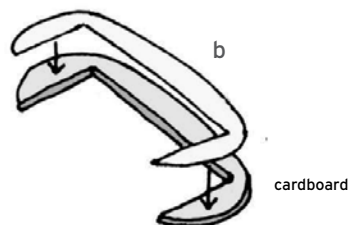

2. Build the seats. **2x**

3. Attach seat belts and pillows. Part **o** is available in two optional colours.
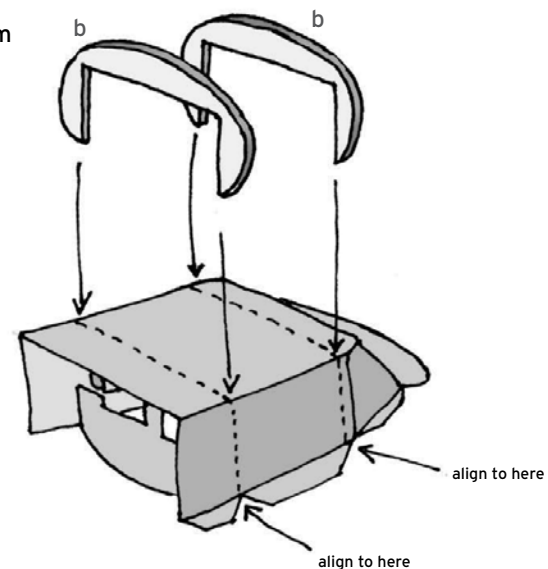

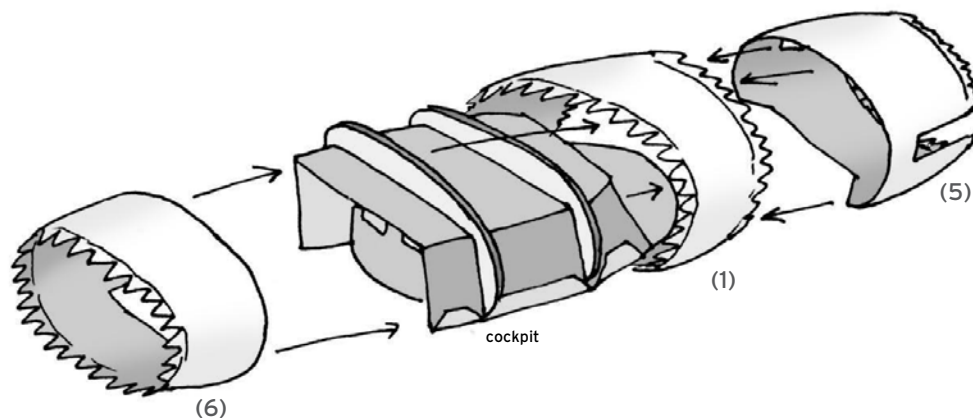

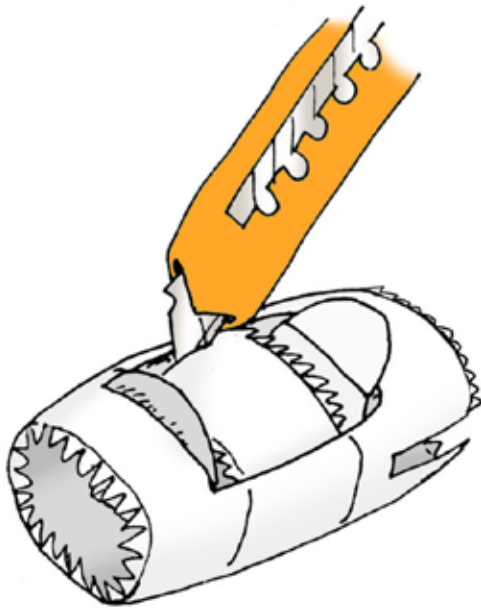

2x

4. Glue both parts b on cardboard to stiffen.

6. On parts (5) and (6) cut out the marked area.
Then glue the fuselage parts around the cockpit.
Part (1) should align with both edges to the b parts.

(6)

7. Cut out the central marked area on part (1) to completely open the cockpit

8. Glue in the seats and glue parts t and u in the corners. Then glue part v on top of the panel. Build the HUD (parts w,x) and glue it onto v.

A-37A version only: Build the gun camera (parts y,z) and glue it about 5mm to the right of the HUD
