

SH 1-012-37

# Zenith CH801 STOL

simplified version

## Bundu Aviation

Privately owned Aircraft, South Africa

The CH801 was designed to be the SUV of Light sports aircraft. It has incredible short take off and landing (STOL) capabilities and a strong structure enabling it to land almost anywhere. The four-seater is available as a kit and is easy to build, maintain and operate. Besides from being flown by Private builders and owners, it is operated all over the world as a bush plane, often for charity purposes.
