Zenith CH801 STOL

Bundu Aviation

Privately owned Aircraft, South Africa

The CH801 was designed to be the SUV of Light sports aircraft. It has incredible short take off and landing (STOL) capabilities and a strong structure enabling it to land almost anywhere. The four-seater is available as a kit and is easy to build, maintain and operate. Besides from being flown by Private builders and owners, it is operated all over the world as a bush plane, often for charity purposes.
