# Saab SK35 Draken

## Trainer version 1

F10 Squadron, Swedish Air Force

The Draken with its famous double-delta wings is one of the most iconic jetfighters of the 20th century. Built by Sweden as their prime interceptor, the Draken had amazing stability and agility at all speeds and a high climb rate. It was used by Sweden, Finland, Denmark and Austria in altogether 45 years of service.

The trainer version had a shorter fuselage and additional fins under the wings. It could carry only a single Drop Tank under the belly.
