

Il-2 cockpit

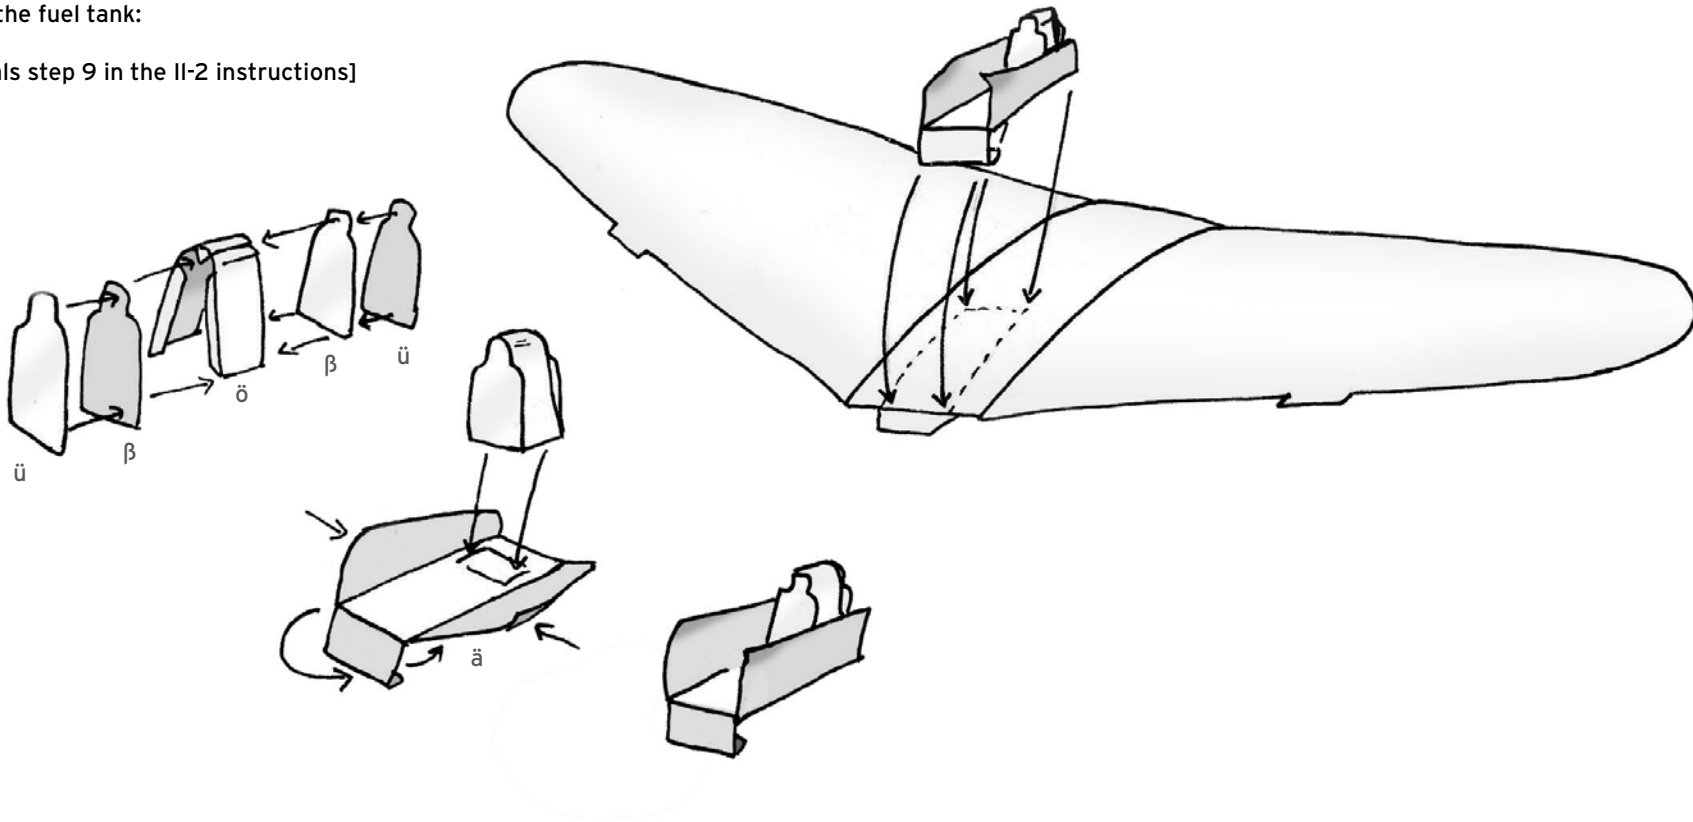

instructions

For all versions except Il-2M-82, Il-2BIS and Il-2UT

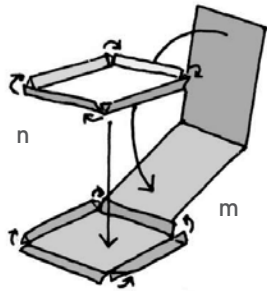

Part designations use lowercase letters so they are not mixed up with parts of the aircraft model

1. If you are building a 1-seater or Il-2I, you must first install what is the rear cabin on 2-seaters with the fuel tank:

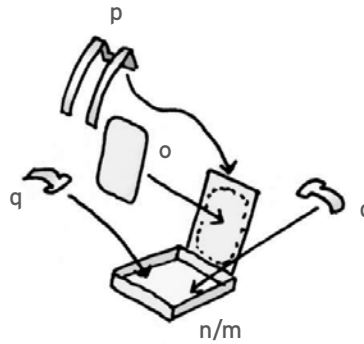

[equals step 9 in the Il-2 instructions]

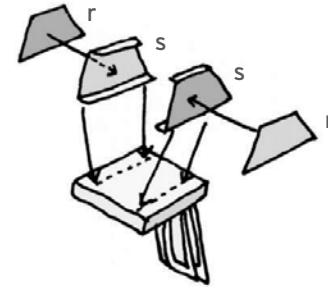

2. glue together the seat

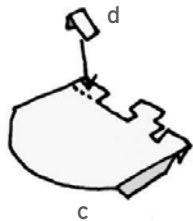

3. add seat belts and pillows

4. glue the seat legs under the seat

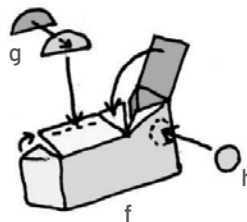

5. glue the side panel on the main panel

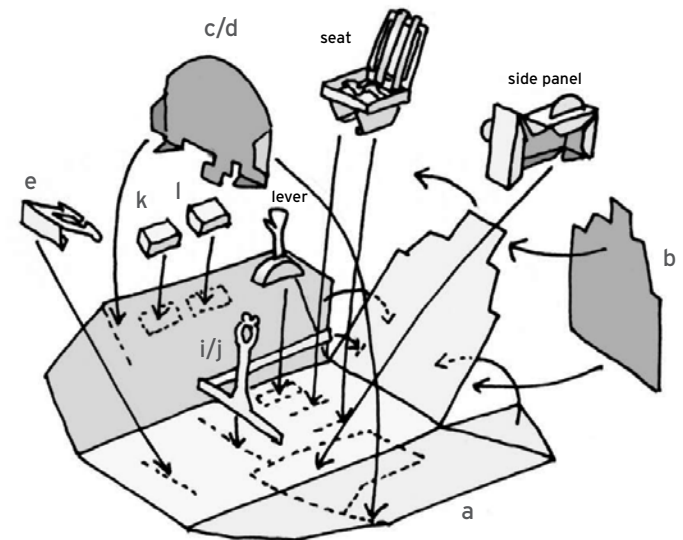

6. build the lever for the right hand side

6. build the side panel for the left hand side

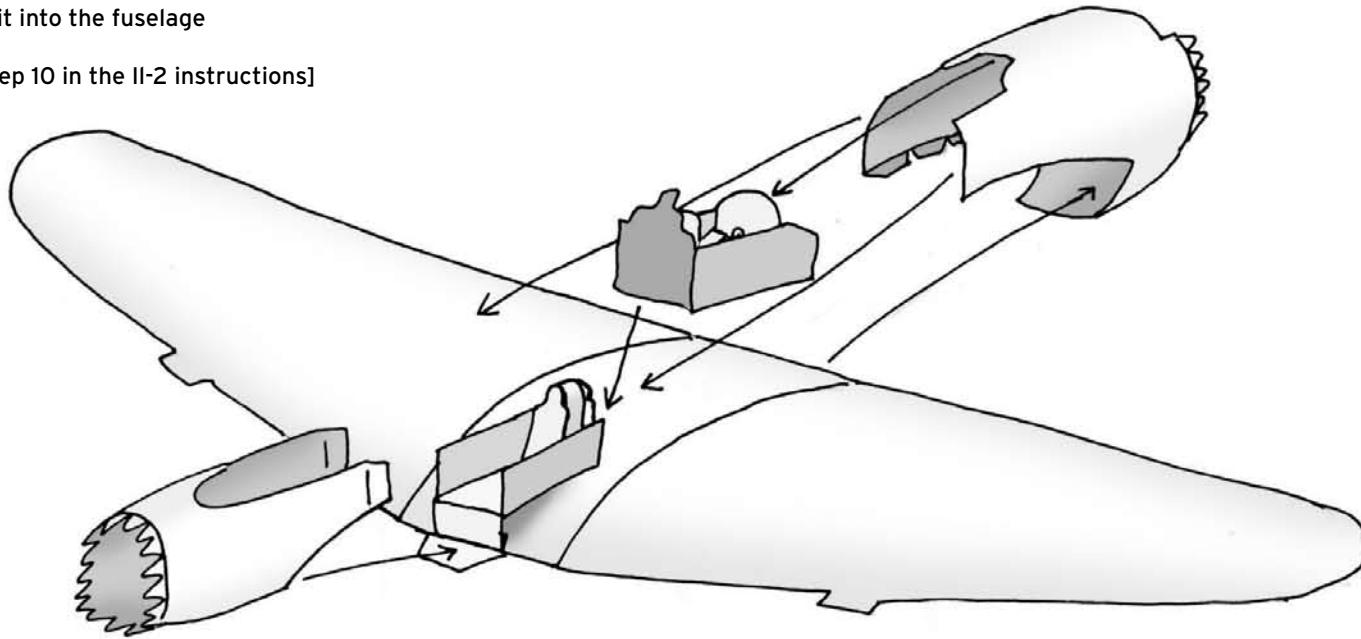

7. glue the parts into the cockpit tub

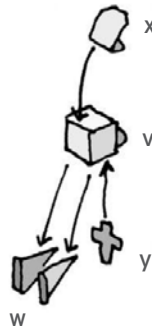

8. install the cockpit into the fuselage

[build along with step 10 in the Il-2 instructions]

9. Build the gunsight

10. glue the gunsight on the surface of the main panel
