# Ilyushin Il-2 Sturmovik on Skis

Black 6  
V-VS, 1941

The Il-2 Sturmovik was the first ever armored Attack aircraft, which earned it the Name "Flying Tank". It was the backbone of Soviet close air support and feared among German ground troops. Its excessive production made it the most-produced military aircraft in history.

The Sturmovik on skis did see service, but did not perform well enough to justify the modifications
