

T-37 cockpit

instructions

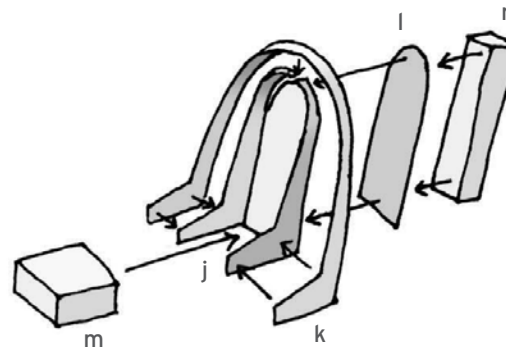

1. Glue the various parts into the cockpit tub

Part designations use lowercase letters so they are not mixed up with parts of the aircraft model.

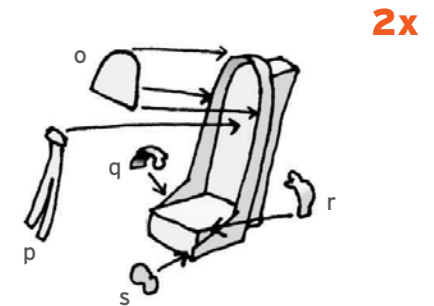

Parts from the T-37 model are given in brackets.

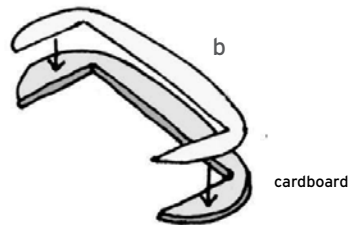

2. Build the seats. **2x**

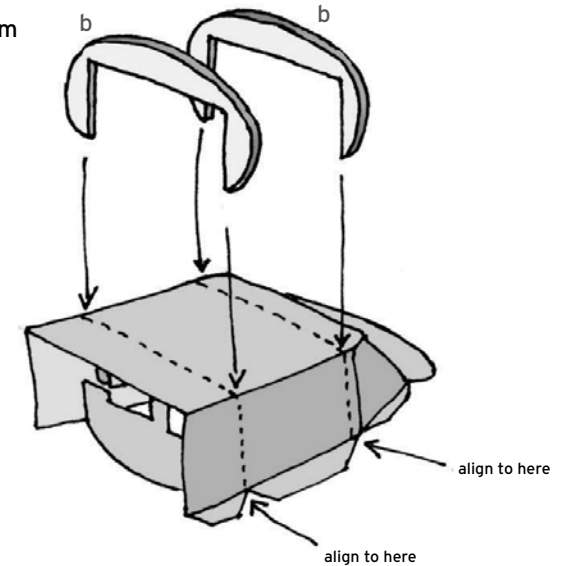

3. Attach seat belts and pillows.
Part **o** is available in two optional colours.

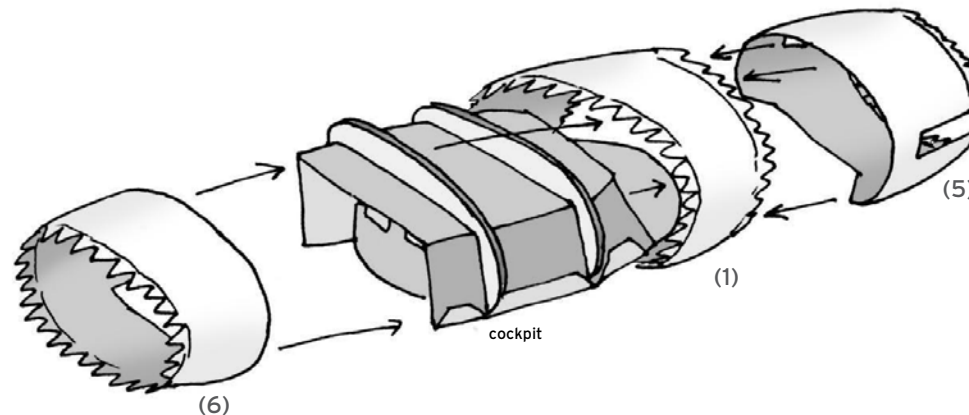

4. Glue both parts **b** on cardboard **2x** to stiffen.

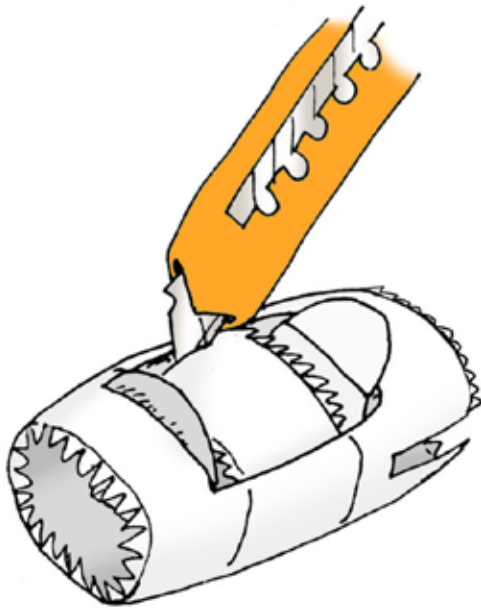

5. Glue both **b** parts onto the bottom of the cockpit tub. Align them with the gaps in the glue tabs.

6. On parts (5) and (6) cut out the marked area. Then glue the fuselage parts around the cockpit. Part (1) should align with both edges to the **b** parts.

7. Cut out the central marked area on part (1) to completely open the cockpit

8. Glue in the seats and glue parts **t** and **u** in the corners. Then glue part **v** on top of the panel.
